

Fewer Steps, *more secure*

Protect your business from fraudsters with seamless biometric authentication and verifiable credentials.

1

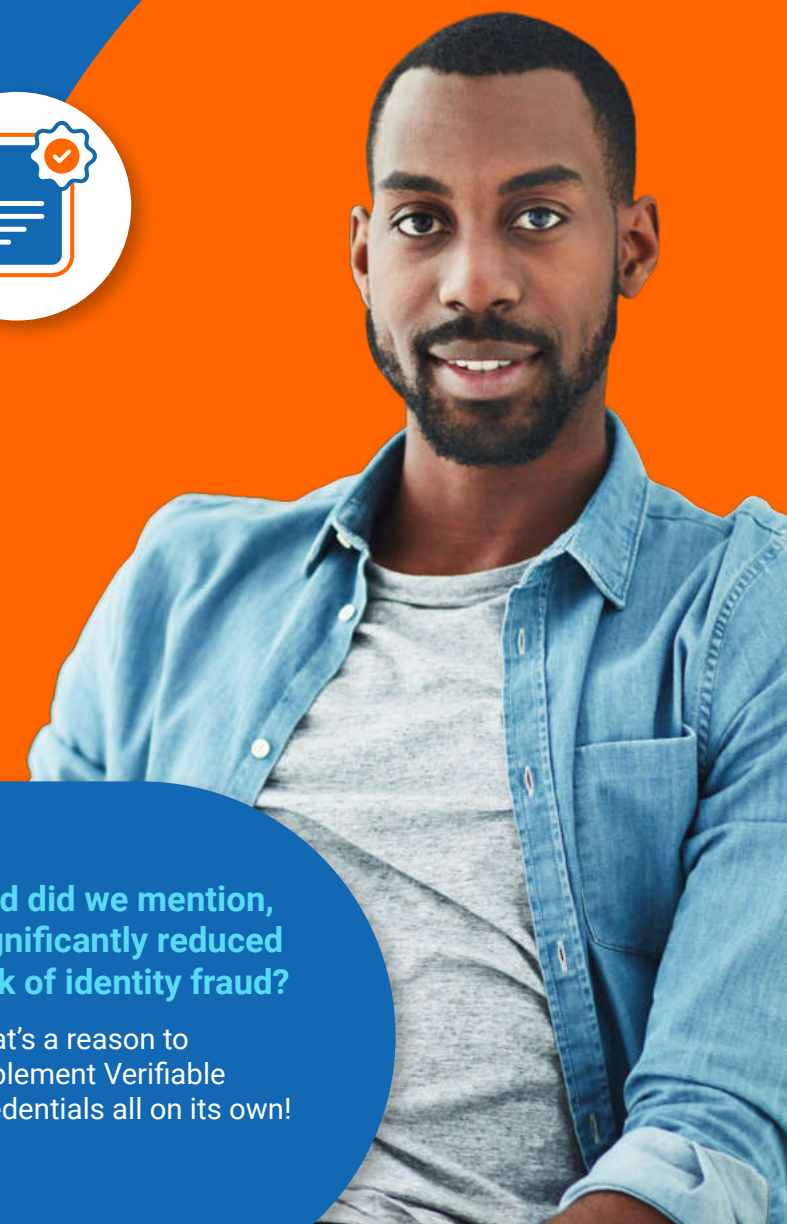

Verifying the identity of customers and staff can be a time-consuming and frustrating process, one that's always vulnerable to fraud.

2

Secure Citizen simplifies this process by enabling clients to plug into our APIs, providing access to biometric verification, identity data checks, remote verification, document validation and verifiable credentials.

3

Our solution seamlessly integrates with any digital onboarding technology, ensuring no wastage of your digital transformation spend.

The benefits of becoming a Secure Citizen Business are huge:

Onboard customers, vendors, or employees in record time

Streamline compliance with immutable audit trails and reporting

Empower customers with control over their personal data sharing

Cut operational costs through automated, paperless processes

Lessen the repercussions of data breaches

Enjoy tamper-proof data sharing

Gain a competitive edge with cutting-edge identity management

Future-proof your business with interoperable Web3 open standards

And did we mention, significantly reduced risk of identity fraud?

That's a reason to implement Verifiable Credentials all on its own!

Contact Secure Citizen today to find out how we can protect your business and give your customers a much faster, more streamlined experience.
